

TC0010 – Verify that elements dynamically loaded

№	Step	Expected result
1.	Navigate to Heroku App	App is successfully loaded
2.	Click on “Dynamic Loading” link	<p>Dynamically Loaded Page Elements page is opened in the same window. Following text:</p> <p>It's common to see an action get triggered that returns a result dynamically. It does not rely on the page to reload or finish loading. The page automatically gets updated (e.g. hiding elements, showing elements, updating copy, etc) through the use of JavaScript.</p> <p>There are two examples. One in which an element already exists on the page but it is not displayed. And another where the element is not on the page and gets added in.</p> <p>Links are shown:</p> <ul style="list-style-type: none">• Example 1: Element on page that is hidden• Example 2: Element rendered after the fact
3.	Click Example 1 link	<p>Dynamically Loaded Page Elements page is opened in the same page</p> <p>Example 1: Element on page that is hidden section is shown</p> <p>Start button is shown</p>
4.	Click “Start” button	<p>Loading... loader is shown</p> <p>Hello World! Is shown after loading</p>
5.	Navigate to previous page	The same expected result as in step 2
6.	Click Example 2 link	<p>Dynamically Loaded Page Elements page is opened in the same page</p> <p>Example 2: Element rendered after the fact</p> <p>Start button is shown</p>
7.	Click “Start” button	<p>Loading... loader is shown</p> <p>Hello World! Is shown after loading</p>
