TC0016 – Horizontal slider works correctly via mouse and keyboard

№	Step	Expected result
1.	Navigate to Heroku App	App is successfully loaded
2.	Click on "Horizontal Slider" link	**Horizontal Slider** page is opened in the same window. Set the focus on the slider (by clicking on it) and use the arrow keys to move it right and left. Or click and drag the slider with your mouse. It will indicate the value of the slider to the right. Horizontal slider with 0 value by default is shown
3.	Change slider position by mouse	Slider can be moved by mouse. Value is changed with following slider position
4.	Change slider position by keyboard arrows (up, bottom, right, left keys)	By pressing up and right keys value is increased By pressing bottom and left keys value is decreased
5.	Reload the page	Slider becomes with 0 value by default
